

Rise and Shine

Vertical lighting solutions mimic the lines of trees, rainfall and the urban jungle.

Lighting

Namus Boutique

Chiho & Partners created an impressive geometrically designed lamp for the main dining room of Namus Boutique, a restaurant in Seongnam, South Korea. Made of steel and acrylic resin, the sculptural object resembles an upside-down metropolis.

Boutique Patrick Roger

Gilbert Moity custom-designed Hanging Forest for an artisanal chocolate shop in Brussels. Suspended above the long central display in the narrow, high-ceilinged store, an array of green-and-white tubes illuminates the sweet treats and the entire space.

Skid Row Housing Trust

Basing its design for a Los Angeles office interior on the concept of 'a forest of light', Lorcan O'Herlihy Architects transformed existing structural columns into illuminated trees made from tubular steel and LED lights.

Chongqing Mountain and City Sales

In the cave-like sales office of a real-estate firm in Chongqing, China, Hong Kong-based One Plus Partnership hung LED lights from the ceiling to mimic rainfall.
